---

## ☐ Summary

Motivated and self-taught full-stack developer with a strong foundation in MERN and Django ecosystems. Passionate about building scalable, user-friendly web applications with modern tools like Next.js, Prisma, and TailwindCSS. Quick learner and eager to contribute to dynamic development teams.

---

## ☐ Education

### **Bachelor of Technology (B.Tech) in Computer Science & Engineering**

*Invertis University, Bareilly*

**Expected Graduation:** June 2025

---

## ☐ Projects

### **AI Powered Visuals**

*Next.js, NeonDB, Prisma, TailwindCSS, Clerk Authentication*

- Developed a full-stack AI-powered image transformation platform.
- Implemented features like background removal/replacement, image resizing, cropping, filters, and social media converters.

- Integrated Clerk for secure user authentication.
  - Used Prisma with NeonDB for backend efficiency and scalability.
  - Built a responsive, modern UI with TailwindCSS.
  - [Optional: Deployed the application on Vercel.]
- 

## ☐ Skills

**Frontend:** HTML, CSS, JavaScript, React.js, Next.js, TailwindCSS

**Backend:** Node.js, Express.js, Django, Prisma

**Database:** MongoDB, PostgreSQL, NeonDB

**Other:** Git, REST APIs, Clerk Authentication, Deployment (e.g., Vercel)

---

## ☐ Additional Learning

- Gained experience through online resources, academic training, and peer collaboration.
  - Actively building projects and staying updated with modern web development trends.
-
